Decision Center Workshop Kit

Design a living leadership system, not a reporting layer

Purpose

Use this kit to design a Decision Center that maintains situational awareness, combines evidence across five domains, focuses leadership intervention, and accelerates explicit decisions.

Workshop outputs

Domain Health Map A shared view across five information domains.	Signal Map Signals to keep, simplify, add, or stop.
Decision Inventory Priority decisions, owners, evidence, and timing.	Intervention Plan Obstacles, resource shifts, and leadership action.
Operating Cadence Review flow, roles, artifacts, and follow-through.	

Recommended sequence

Prepare Select one outcome or portfolio and gather current evidence.
Assess Map domain health and signal quality.
Decide Build the decision inventory and intervention plan.
Operate Design the cadence and review template.

Use note: Proposed Decision Center workshop material. Adapt to context. Do not use to rank individuals or teams.
