LEARNING LOOP WORKSHOP

Learn faster.
Decide better.
Improve outcomes.

Execute the complete loop from outcome through adaptation.

OUTPUTS

What the workshop produces

Leave with artifacts ready for the first operating cycle.

01

Outcome

Meaningful change and proof

02

Bet

Belief and uncertainty

03

Experiment

Bounded way to learn

04

Evidence

Signals that change confidence

OPERATING FLOW

From information to action

Each stage must inform the next decision.

CORE MODEL

The complete learning loop

A loop is complete only when evidence changes a decision and the next move.

OUTCOME

What must become different?

BET

What do we believe?

EXPERIMENT

What is the smallest responsible test?

EVIDENCE

What changes confidence?

DECISION

Continue, adapt, scale, or stop?

ADAPTATION

What changes next?

EXERCISE 1

OUTCOME

What must become different?

PROMPTS

- What is uncertain?
- What is observable?
- What would disconfirm the belief?
- What decision follows?

WORKBOOK OUTPUT

OUTCOME Canvas

Observation
Interpretation
Evidence gap
Decision supported
Next action

EXERCISE 2

BET

What do we believe?

PROMPTS

- What is uncertain?
- What is observable?
- What would disconfirm the belief?
- What decision follows?

WORKBOOK OUTPUT

BET Canvas

Observation
Interpretation
Evidence gap
Decision supported
Next action

EXERCISE 3

EXPERIMENT

What is the smallest responsible test?

PROMPTS

- What is uncertain?
- What is observable?
- What would disconfirm the belief?
- What decision follows?

WORKBOOK OUTPUT

EXPERIMENT Canvas

Observation
Interpretation
Evidence gap
Decision supported
Next action

EXERCISE 4

EVIDENCE

What changes confidence?

PROMPTS

- What is uncertain?
- What is observable?
- What would disconfirm the belief?
- What decision follows?

WORKBOOK OUTPUT

EVIDENCE Canvas

Observation
Interpretation
Evidence gap
Decision supported
Next action

EXERCISE 5

DECISION

Continue, adapt, scale, or stop?

PROMPTS

- What is uncertain?
- What is observable?
- What would disconfirm the belief?
- What decision follows?

WORKBOOK OUTPUT

DECISION Canvas

Observation
Interpretation
Evidence gap
Decision supported
Next action

COMMITMENT

Learning Review Commitment

Name the owner, evidence, boundary, and review point.

Change	What becomes different?
Evidence	What changes confidence?
Owner	Who is accountable?
Review	When will a decision be made?
